Q: How to make the image size not to change during adjusting its width or height? In the picture, the right box is set to be 100% wide and 200px high, while the left one is set to be 100% by width of its image. The result is the right box is 100% width while the left box is 200px high, not like I intended. I have to make the right box to be 200px high and the left box to be 100% width, the same as how the output is. .parent { width: 100%; height: 200px; position: relative; display: table; } .box {
