## What's New in the?

Graphical Properties in Dimension: Objects on the same layer can have graphical properties applied to them. There are 6 properties available for use: Red, Green, Blue, Underline, Strikeout, and Thickness (video: 2:45 min.) New and improved 3D printing options: With the new 3D Print option, you can export 3D models directly to Zprinter and an Slicer to create.stl files that can then be printed directly from the Slicer panel. When printing, Zprinter will automatically use the settings you have defined for the layers and objects, and layers and objects with the same settings will be printed on the same layer. If you have multiple printers, the settings will be used to assign different colors and thickness to each printer. (video: 1:10 min.) Additional Improvements: Improvements to Performance and Stability: Improved performance for full file opening and exporting of large files. Improvements to Layer and Object Sync functionality that will save time on the re-syncing process after a crash. New Ribbon System: The ribbon system in AutoCAD has been improved to help you more easily navigate through options. A new ribbon will contain the most commonly used commands. The ribbon ribbon will be grouped in a way that's intuitive for typical AutoCAD usage. This will allow you to access more functionality in less clicks. Exclusive collaboration in AutoCAD: Collaborative design is the way of the future, and AutoCAD is leading the way with this new feature. With the new "collaboration group," you can select the initials of users who need to edit a drawing for the group. While editing the drawing, other members of the collaboration group are able to view only the changes to the drawing that the original author made. When the user is finished editing, the changes will be reverted to the original state (regardless of who made the changes). Improved Airspace: Airspace settings will help you ensure that the shape of your object is consistent and accurate when it is being exported. The "airspace value" in the tools palette will show the percentage of the view that is included in the model. Using the "airspace value" will help you avoid gaps and shape distortion when exporting. Powerful commands in 3D: The 3D Drafting
